SAFETY DATA SHEET

BARRIER SEAL 56 R&O

Section 1. Identification

GHS product identifier	: BARRIER SEAL 56 R&O
Product code	: BS46R7O
Chemical name	: 1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters, C10-rich
Other means of identification	 Diisodecyl phthalate (mixed isomers); 1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters, C10 rich; 1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters; 1, 2-Benzenedicarboxylic acid, di-C9-C11 branched alkyl ester S, C10-rich; di-"isodecyl" phthalate; DIDP
Product type	: Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Identified uses	
Not available.	
Uses advised against	Reason

Supplier's details	: Royal Purple, Inc. 1 Royal Purple Lane Porter, Texas 77365 USA Phone:281-354-8600 Emergency Phone:281-354-8600
Emergency telephone number (with hours of	: 24 hr. CHEMTREC 1-800-424-9300 / International 1-703-527-3887

operation)

Section 2. Hazards identification

OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mixture	: EYE IRRITATION - Category 2B
GHS label elements	
Signal word	: Warning
Hazard statements	: Causes eye irritation.
Precautionary statements	
Prevention	: Wear eye or face protection. Wash hands thoroughly after handling.
Response	: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
Storage	: Not applicable.
Disposal	: Not applicable.
Hazards not otherwise classified	: None known.

Section 3. Composition/information on ingredients

Substance/mixture	: Substance
Chemical name	: 1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters, C10-rich
Other means of identification	 Diisodecyl phthalate (mixed isomers); 1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters, C10 rich; 1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters; 1, 2-Benzenedicarboxylic acid, di-C9-C11 branched alkyl ester S, C10-rich; di-"isodecyl" phthalate; DIDP

CAS number/other identifiers

CAS number	: 68515-49-1
------------	--------------

Ingredient name	%	CAS number
1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters, C10-rich	100	68515-49-1

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	:	Immediately flush eyes with plenty of water, occasionally eyelids. Check for and remove any contact lenses. Cont minutes. If irritation persists, get medical attention.		
Inhalation	:	Remove victim to fresh air and keep at rest in a position of breathing, if breathing is irregular or if respiratory arrest of respiration or oxygen by trained personnel. It may be dan aid to give mouth-to-mouth resuscitation. Get medical att persist or are severe. If unconscious, place in recovery po- immediately. Maintain an open airway. Loosen tight cloth waistband.	ccurs, provide artificial gerous to the person provid ention if adverse health effo osition and get medical atte	ding ects ention
Skin contact	:	Wash contaminated skin with soap and water. Remove c shoes. Get medical attention if symptoms occur. Wash c shoes thoroughly before reuse.		۹n
Ingestion	:	Wash out mouth with water. Remove dentures if any. Rekep at rest in a position comfortable for breathing. If mathe exposed person is conscious, give small quantities of exposed person feels sick as vomiting may be dangerous directed to do so by medical personnel. If vomiting occurs so that vomit does not enter the lungs. Get medical attem persist or are severe. Never give anything by mouth to an unconscious, place in recovery position and get medical at an open airway. Loosen tight clothing such as a collar, tie	terial has been swallowed a water to drink. Stop if the b. Do not induce vomiting u s, the head should be kept tion if adverse health effect of unconscious person. If attention immediately. Main	and inless low ts
Most important symptoms		ts, acute and delayed		
Potential acute health eff				
Eye contact		Causes eye irritation.		
Inhalation		No known significant effects or critical hazards.		
Skin contact		No known significant effects or critical hazards.		
Ingestion		No known significant effects or critical hazards.		
Over-exposure signs/syn	nptom	<u>S</u>		
Eye contact	:	Adverse symptoms may include the following: irritation watering redness		
Inhalation	:	No specific data.		
Date of issue/Date of revision		: 04/27/2015	Version : 1	2/10

Section 4. First aid measures

Skin contact	: No specific data.		
Ingestion	: No specific data.		
Indication of immediate medical attention and special treatment needed, if necessary			
Notes to physician	 Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. 		
Specific treatments	: No specific treatment.		
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.		

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	: No specific data.
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures			
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.	
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".	
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).	
Methods and materials for containment and cleaning up			
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and	

Section 6. Accidental release measures

Large spill : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling		
Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters	
Occupational exposure limits	
None.	
Appropriate engineering : controls	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure : controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measures	
Hygiene measures :	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection :	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	

Section 8. Exposure controls/personal protection

Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	 Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

<u>Appearance</u>		
Physical state	id.	
Color	available.	
Odor	available.	
Odor threshold	available.	
рН	available.	
Melting point	C (-49°F)	
Boiling point	°C (865.4°F)	
Flash point	ed cup: 232°C (449.6°F) n cup: 244°C (471.2°F)	
Evaporation rate	available.	
Flammability (solid, gas)	available.	
Lower and upper explosive (flammable) limits	er: 0.3% er: 1.6%	
Vapor pressure	a (0 mm Hg) [room temperature]	
Vapor density	available.	
Relative density	available.	
Solubility	available.	
Solubility in water		
Partition coefficient: n- octanol/water		
Auto-ignition temperature	°C (761°F)	
Decomposition temperature	available.	
Viscosity	matic (40°C (104°F)): 0.388 cm ² /s (38.8 cSt)

Section 10. Stability and reactivity

Date of issue/Date of revision	: 04/27/2015	Version : 1	5/10
Conditions to avoid	: No specific data.		
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazard	ous reactions will not occur.	
Chemical stability	: The product is stable.		
Reactivity	: No specific test data related to reactivity available for	this product or its ingredients	

Section 10. Stability and reactivity

Incompatible materials : No specific data.

 Hazardous decomposition
 : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
1,2-Benzenedicarboxylic acid, di-C9-11-branched alkyl esters, C10-rich	LD50 Dermal	Rabbit	16000 mg/kg	-
	LD50 Oral	Rat	>60000 mg/kg	-

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available. to Annex II of MARPOL 73/78 and the IBC Code

Section 15. Regulatory information
